## CONTENTS

<i>M. U. Akhmet and A. Kashkynbayev</i> Nonautonomous transcritical and pitchfork bifurcations in impulsive systems	737
<i>H. Ansari-Toroghy, F. Farshadifar, and Sh.Habibi</i> The cozero-divisor graph relative to finitely generated modules . . . . .	749
<i>Abdelouaheb Ardjouni, Ahcene Djoudi</i> Existence and positivity of solutions for a totally nonlinear neutral periodic differential equation . . . . .	757
<i>Muhammad Arshad, Abdullah Shoaib, Mujahid Abbas, and Akbar Azam</i> Fixed points of a pair of Kannan type mappings on a closed ball in ordered partial metric spaces . . . . .	769
<i>Imre Ferenc Barna and LászlóMátyás</i> Analytic solutions for the one-dimensional compressible Euler equation with heat conduction and with different kind of equations of state . .	785
<i>Huseyin Bereketoğlu and Gizem S. Oztepe</i> Convergence of the solution of an impulsive differential equation with piecewise constant arguments . . . . .	801
<i>Bayram Çekim</i> New kinds of matrix polynomials . . . . .	817
<i>Ivan Chajda, Miroslav Kolařík, and Helmut Länger</i> Algebras assigned to ternary relations . . . . .	827
<i>T. Dehghan-Zadeh, Hongbo Hua, A. R. Ashrafi, and N. Habibi</i> Remarks on a conjecture about Randić index and graph radius . . . . .	845
<i>Yan Dong</i> Gradient estimates in Morrey spaces of weak solutions to quasilinear parabolic systems of Hörmander's vector fields . . . . .	851
<i>Zuzana Farkasová and Danica Jakubíková-Studenovská</i> On radical classes of monounary algebras . . . . .	871

**CONTENTS**

**S. Fegyverneki**  
A simple robust estimation for parameters of Cauchy distribution . . . . . 887

**Zrinka Franušić**  
Diophantine quadruples in the ring of integers of the pure cubic field  $Q(\sqrt[3]{2})$  893

**Biol Gunduz and Sezgin Akbulut**  
Strong convergence of an explicit iteration process for a finite family of asymptotically quasi-nonexpansive mappings in convex metric spaces 905

**Biol Gunduz and Sezgin Akbulut**  
Strong and  $\Delta$ -convergence theorems in hyperbolic spaces . . . . . 915

**Eszter K. Horváth**  
Islands: from coding theory to enumerative combinatorics and to lattice theory – overview and open problems . . . . . 927

**Shuliang Huang and Öznur Gölbaşı**  
On Lie ideals and generalized derivations of  $*$ -prime rings . . . . . 941

**Nurettin Irmak**  
Balancing with balancing powers . . . . . 951

**Refik Keskin, Olcay Karaath, and Zafer Şiar**  
Positive integer solutions of the Diophantine equations  $x^2 - 5F_n xy - 5(-1)^n y^2 = \pm 5^r$  . . . . . 959

**H. Khatibzadeh**  
Global behavior of solutions to a second order delay differential equation 973

**Xhevat Z. Krasniqi**  
On absolute generalized Hausdorff summability of orthogonal series . . . 981

**V. Lampret**  
An acceleration of convergence to some generalized-Euler-constant function 991

## CONTENTS

<i>Changwen Li, Xuemei Zhang, and Xiaolan Yi</i> On $\tau$ -supplemented subgroups of finite groups . . . . .	997
<i>V. V. Marynets and K. V. Marynets</i> On Goursat-Darboux boundary-value problem for systems of non-linear differential equations of hyperbolic type . . . . .	1009
<i>Ali Olgun</i> On bivariate Meyer-König and Zeller operators . . . . .	1021
<i>Recep Sahin and Sebahattin İkikardes</i> Squares of congruence subgroups of the Extended Modular Group . . . . .	1031
<i>Jiangtao Shi and Cui Zhang</i> Finite groups in which some particular subgroups are TI-subgroups . . . . .	1037
<i>Mevlüt Tunç</i> On some integral inequalities via $h$ -convexity . . . . .	1041
<i>Burcu Nişancı Türkmen</i> Modules that have a Rad-supplement in every cofinite extension . . . . .	1059
<i>Marjan Uddin and Sirajul Haq</i> On the numerical solution of generalized nonlinear Schrodinger equation using RBFs . . . . .	1067
<i>Aynur Yalçiner</i> On generalizations of two curious divisibility properties . . . . .	1085
<i>B. Yılmaz, G. Başcanbaz-Tunca, and A. Aral</i> Remark on weighted approximation properties of generalized Picard oper- ators . . . . .	1091
<i>Huilin Zhu, Gökhan Soydan, and Wei Qin</i> A note on two Diophantine equations $x^2 \pm 2^a p^b = y^4$ . . . . .	1105
