

Miskolc Mathematical Notes

VOLUME 24 (2023), NUMBER 2

CONTENTS

Seyed Hassan Alavi, Jalal Choulaki, and Asharf Daneshkhah

A classification of 2-designs with prime replication numbers and flag-transitive automorphism groups 535

Javid Ali and Mohd Jubair

Existence and estimation of the fixed points of enriched Berinde nonexpansive mappings 541

Muhammad Aamir Ali, Jarunee Soontharanon, Hüseyin Budak, Thanin Sitthiwiratham, and Michal Fečkan

Fractional Hermite-Hadamard inequality and error estimates for Simpson's formula through convexity with respect to a pair of functions 553

Nazlum Deniz Aral, Hacer Şengül Kandemir, and Mikail Et

On ρ -statistical convergence of order α of sequences of sets 569

Mohammad Ashraf and Mohammad Afajal Ansari

σ -centralizers of generalized matrix algebras 579

Enes Ata and İ. Onur Kıymaz

A new generalized Laplace transform and its applications to fractional Bagley-Torvik and fractional harmonic vibration problems 597

Ivan Atamas, Viktor Denysenko, and Vitalii Slyn'ko

Construction of vector Lyapunov function for nonlinear large-scale system with periodic subsystems 611

Gábor Bacsó and József Túri

An enumeration approach to network evolution 625

Moustafa Beddani, Hamid Beddani, and Michal Fečkan

Qualitative study for impulsive pantograph fractional integro-differential equation via ψ -Hilfer derivative 635

CONTENTS

Pintu Bhunia, Aniket Bhanja, Debmalya Sain, and Kallol Paul
Numerical radius inequalities of operator matrices from a new norm on $\mathcal{B}(\mathcal{H})$ 653

Çiğdem Biçer and Celil Nebiyev
Rad- \oplus -Supplemented Lattices 665

Mehmet Bozer, Mehmet Ali Özarslan, and Hülya Demez
Solutions of Certain Class of Non-Linear Time-Fractional Diffusion Equations via the Fractional Differential Transform Method 673

Abdullah Çağman
Repdigits as sums of three Half-companion Pell numbers 687

İbrahim Çanak and Hülya Bakıcıerler
Tauberian conditions under which statistical convergence follows from statistical summability by weighted mean method in two-normed spaces 699

Chonjaroen Chairatsiripong, Lanchakorn Kittiratanawasin, Damrongsak Yambangwai, and Tanakit Thianwan
Convergence theorem and convergence rate of a new faster iteration method for continuous functions on an arbitrary interval 709

Ivan Chajda and Helmut Länger
Tolerances on posets 725

Sumit Chandok
Existence of solutions to multivalued problems in incomplete metric spaces with applications 737

Tuğrul Cömert and Erhan Pişkin
Blow-up of weak solutions for a higher-order heat equation with logarithmic nonlinearity 749

CONTENTS

Zohreh Eskandari, R. Khoshsiar Ghaziani, and Zakieh Avazzadeh
Rich dynamics of a discrete-time prey-predator model 763

Yacine Halim, Amira Khelifa, and Niâma Mokrani
Connection of Balancing numbers with solution of a system of two higher-order difference equations 779

Bidu Bhusan Jena and Susanta Kumar Paikray
A New Approach to Statistical Riemann-Stieltjes integrals 789

Kulandhivel Karthikeyan and Ozgur Ege
Boundary value problems of higher order fractional integro-differential equations involving Gronwall's inequality in Banach spaces 805

Mohammad Salahuddin Khan and Abdul Nadim Khan
An Engel condition with b -generalized derivations in prime rings 819

Mehdi Khodabakhshi, Seyyed Mansour Vaezpour, and Armin Hadjian
Existence of two weak solutions for some elliptic problems involving $p(x)$ -biharmonic operator 829

Nurten Kiliç and Özkan Öcalan
A new oscillation result for nonlinear differential equations with nonmonotone delay 841

Berna Koşar and Hasan Hüseyin Ökten
Amply essential g -supplemented modules 853

Cemaliye Kürt and Mehmet Ali Özarıslan
Bivariate k -Mittag-Leffler functions with 2D- k -Laguerre-Konhauser polynomials and corresponding k -fractional operators 861

CONTENTS

Ricai Luo, Lin Hou, and Jing Zhao

Optimal feedback control of Hilfer fractional evolution inclusions involving history-dependent operators 877

Khaled Mehrez, Sourav Das, and Anish Kumar

Monotonicity properties and functional inequalities for the Barnes Mittag-Leffler function 893

István Mező

On the comparison of the Marcinkiewicz and Luxemburg norms of the exponential space 909

Amirhossein Nafei, Chien-Yi Huang, Seyed Mohammadtaghi Azimi, and Amir Javadpour

An optimized model for neutrosophic multi-choice goal programming . . . 915

Sogol Niazian, Mona Aaly Kologani, Shahin Homayon Arya, and Rajab Ali Borzooei

On co-annihilators in equality algebras 933

Arzu Denk Oğuz, Jehad Alzabut, Abdullah Özbekler, and Jagan Mohan Jonnalagadda

Lyapunov and Hartman-type inequalities for higher-order discrete fractional boundary value problems 953

Mohamed El Ouaarabi, Chakir Allalou, and Said Melliani

Existence of weak solutions for a double phase variable exponent problem with a gradient dependent reaction term 965

Hilal Başak Özdemir and Celil Nebiyev

Strongly $\oplus - g$ -Radical Supplemented Modules 981

Miskolc Mathematical Notes

VOLUME 24 (2023), NUMBER 2

CONTENTS

<i>Said Ait Temghart, Chakir Allalou, Khalid Hilal, and Stanislas Ouaro</i> Entropy solutions for some elliptic problems involving the generalized $p(u)$ -Laplacian operator	989
<i>Zhi-Gang Wang, Manzoor Hussain, and Xiao-Yuan Wang</i> On sharp solutions to majorization and Fekete-Szegő problems for starlike functions	1003
<i>Bei Wang</i> Convergence relation between solutions of a $p(x)$ -Landau-Lifschitz type and $p(x)$ -harmonic maps	1021
<i>Yifan Yang and Xiaomin Chen</i> Almost quasi-Yamabe solitons on contact metric manifolds	1033
<i>Hasret Yazarli</i> Some algebraic properties of generalized q - Cesàro matrix $C_g(q)$	1049
<i>Hazal Yüksekaya and Erhan Pişkin</i> Existence and exponential decay of a logarithmic wave equation with distributed delay	1057
<i>Nabil Zeidi</i> n -fine rings	1073
