

CONTENTS

Emrullah Aykan Alan, İmdat İşcan, and Erhan Set
Hermite-Hadamard type inequalities for (M_ϕ, M_ψ) -convex functions 5

Ibtisam Aldawish, Abbas Kareem Wanas, Georgia Irina Oros, and Sheza M. El-Deeb
Study on a subclass of holomorphic functions associated to the q -analogue multiplier transformation defined in a Janowski domain 15

Chems Eddine Arroud, Nabiha Saba, Ali Boussayoud, Salah Boulaaras, Baghdad Aloui, and Nesrine Harrouche
Symmetric and generating functions for certain products of numbers and polynomials with application to bifurcation analysis 35

Belqassim Azzouz, Moustafa Beddani, and Hamid Beddani
Nonlocal integral boundary value problems for sequential differential equation involving a fractional mixed derivatives 59

Öykü Bal, Nazife Erkuşun-Özcan, and Ahsen Sena Yurtoğlu
Demi version of quasi Levi and Levi operators on Banach lattices 77

Narmin Bayat and Celil Nebiyev
Some properties of r -small elements in lattices 89

Abasalt Bodaghi and Hemen Dutta
Some approximations on a system of multi-quadratic-quartic functional equations 97

Fatima Ezzahra Bourhim, Chaima El Maghraoui, Ali El Mfadel, and M'hamed Elomari
Existence and stability of mild solutions for hybrid fractional semi-linear evolution equations 111

CONTENTS

Ivan Chajda and Helmut Länger
Algebras and varieties where Sasaki operations form an adjoint pair 127

Soumitra Das, Yeliz Kara, and Özgür Taşdemir
Semisimple-continuous modules 149

Alexander Domoshnitsky, Oleg Kupervasser, Seshadev Padhi, and Satyam Narayan Srivastava
Vallée-Poussin theorem for Katugampola fractional functional differential equations 167

Trinh Viet Duoc
Extending a theorem of Datko for evolutionary families 181

Baohua Dong, Xuanxuan Hu, and Jingshi Xu
Bourgain-Lebesgue spaces 193

Hong Huang and Tiantian Zhou
Existence of super-solutions of a discrete equation of Wolff type 209

Jabar Salih Hassan
Existence of solutions for a general class of nonlinear fractional integral operators 219

Fei Jin, Qianhong Zhang, and Ruiqi Yan
Dynamical behavior of a two dimensional difference equation system with quadratic term 229

Nematollah Kadhoda, Naser Safaeian Hamzehkolaei, Yaser Khalili, and Shiva Eshaghi
Analytical solutions to the double-chain DNA system by two computational techniques 245

CONTENTS

Mohsen Kian and Zainab Peymani
Some generalizations of Mercer inequality and its operator extensions . . . 261

Berna Koşar, Celil Nebiyev, and Hasan Hüseyin Ökten
Some properties of weakly g -supplemented lattices 275

Maohua Le and Gökhan Soydan
Further results on the Lebesgue-Nagell equation $dx^2 + p^{2m}q^{2n} = 4y^p$. . . 283

Badreddine Meftah, Wedad Saleh, and Abdelghani Lakhdari
Sándor's inequality for Riemann-Liouville fractional integrals 291

Hasan Hüseyin Ökten, Figen Erilmaz, and Berna Koşar
A generalization of essential supplemented lattices 299

İlknur Özgüç
Strong almost convergence with respect to an Orlicz function 307

Ia Ramishvili, Tea Shavadze, and Tamaz Tadumazde
On the representation of solution for a class of perturbed controlled neutral
functional-differential equation with the continuous initial condition 315

**Daniel Alfonso Santiesteban, Ricardo Abreu Blaya, Yamilet Quintana, and José
María Sigarreta Almira**
On fractal Bernoulli differential equations and their applications 329

Mohammad Shahriari
Reconstruction of the Sturm-Liouville differential operators with two con-
stant delays 345

Sumit Som and Argha Ghosh
Further results on I -convergence of multiset sequences 359

CONTENTS

Hranislav Stanković

The (non-)extendability of Embry's Theorem 373

Tímea Melinda Személy Fülöp

Integral characterizations of uniform h-dichotomy in mean for discrete-time stochastic skew-evolution semiflows 379

Rodolfo Viera

A remark on dimensionality reduction in discrete subgroups of \mathbb{R}^d 401

Minan Wang, Aimin Liu, and Wenhua Liu

Dynamics of traveling wave solutions and chaos for generalized KdV-Burgers equation 407

Weibing Wang and Piao Liu

Impulsive Basset fractional differential equation with nonlinear boundary condition 425

Heng Yang and Jiang Zhou

Characterization of Lipschitz functions via commutators of maximal operators on slice spaces 441

Dechuan Zhou, Hwankoo Kim, and Kui Hu

Homological characterizations of G-Krull domains and G-Dedekind domains 455
