

Mathematical Notes

Volume 1, Number 2 (2000)

Contents

Contributed Papers

N. Kwami AGBEKO: How to Characterize Some Properties of Measurable Functions	87–98
Michal FEČKAN: Periodic and Chaotic Solutions in Infinite Dimensional Systems	99–107
Aurél GALÁNTAI: Rank Reduction and Conjugation	109–118
Mihály HUJTER: Partitioning the N-Space into Collinear Sets of Orthants	119–126
Imre JUHÁSZ: Computing Volume of Solids Bounded by Bézier Surfaces	127–133
Irena RACHŮNKOVA and Milan TVRDÝ: Method of Lower and Upper Functions and the Existence of Solutions to Singular Periodic Problems for Nonlinear Differential Equations of Order Two	135–143
Sándor RADELECZKI: Classification Systems and the Decompositions of a Lattice into Direct Products	145–156
Miklós RONTÓ and Tamara CSIKOS-MARINETS: On the Investigation of Some Non-Linear Boundary Value Problems with Parameters	157–166
Kurt W. TOMANTSCHGER: Solutions of a System of Second-Order Ordinary Differential Equations	167–170
