

Miskolc Mathematical Notes

VOLUME 17 (2016), NUMBER 2

CONTENTS

<i>M. Akhmet and S. Çağ</i> Analysis of impact chattering	707
<i>Rafail Alizade and Yılmaz Mehmet Demirci</i> Closures of Proper Classes	723
<i>Badr S. Alkahtani, Pranay Goswami, and Teodor Bulboacă</i> Estimate for initial MacLaurin coefficients of certain subclasses of bi-univalent functions	739
<i>J. Amjadi, S.M. Sheikholeslami, and L. Volkmann</i> Global rainbow domination in graphs	749
<i>Mahdieh Azari</i> Some variants of the Szeged index under rooted product of graphs	761
<i>M. La Barbiera and G. Restuccia</i> Computing Gröbner bases and invariants of the symmetric algebra	777
<i>İ. Çanak, Ü. Totur, and S. A. Sezer</i> Necessary and sufficient conditions for geometric means of sequences in multiplicative calculus	791
<i>Ivan Chajda and Helmut Länger</i> Near semirings and semirings with involution	801
<i>Guohui Chen and Di Han</i> A new sums and its reciprocity theorem	811
<i>Nejmeddine Chorfi and Vicențiu D. Rădulescu</i> Continuous spectrum for some classes of $(p, 2)$ -equations with linear or sublinear growth	817

CONTENTS

R. M. El-Ashwah and A. H. Hassan
Fekete-Szegö inequalities for certain subclass of analytic functions defined
by using Salagean operator 827

E. M. Elsayed
On a max type recursive sequence of order three 837

A. Filipin and A. Jursić
On the size of Diophantine m -tuples for linear polynomials 861

Z. Finta
Uniform approximation by generalized q -Bernstein operators 877

B. Hazarika and A. Esi
On generalized statistical convergence of sequences of sets of order α . . . 893

Abdullah Kablan and Manaf Dzh. Manafov
Sturm-Liouville Problems with finitely many point δ -interactions and eigen-
parameter in boundary condition 911

Yu.S. Linchuk
On a generalized Rubel's operator equation 925

Adrian Magdaş
A Perov type theorem for cyclic contractions and applications to systems
of integral equations 931

Mircea Merca
On the Song recurrence relation for the Riemann zeta function 941

Miloud Mihoubi and Asmaa Rahim
The r -Jacobi-Stirling numbers of the second kind 947

Miskolc Mathematical Notes

VOLUME 17 (2016), NUMBER 2

CONTENTS

- M. T. Mustafa*
New parametric solutions of some Abel equations 957
- Ali Reza Naghipour*
The induced subgraph of the unitary Cayley graph of a commutative ring
over regular elements 965
- Marija S. Najdanović and Ljubica S. Velimirović*
On the Willmore energy of curves under second order infinitesimal bending 979
- László Németh and László Szalay*
Alternating sums in hyperbolic Pascal triangles 989
- O. Zeki Okuyucu, İsmail Gök, Yusuf Yaylı, and Nejat Ekmekci*
Bertrand curves in three dimensional Lie groups 999
- P. Peška, J. Mikeš, H. Chudá, and M. Shiha*
On holomorphically projective mappings of parabolic Kähler manifolds . . 1011
- Ioan A. Rus and Marcel-Adrian Şerban*
Some fixed point theorems for nonself generalized contraction 1021
- P. Samusenko*
Asymptotic integration of singularly perturbed linear systems of differential-
algebraic equations 1033
- Mehmet Zeki Sarıkaya and Hüseyin Yildirim*
On Hermite-Hadamard type inequalities for Riemann-Liouville fractional
integrals 1049
- Boris Šobot*
Partition properties on countable bipartite graphs 1061
