

CONTENTS

<i>Rashid Abu-Dawwas, Ala'a Mesleh, and Khaldoun Al-Zoubi</i> Some notes on first strongly graded rings	547
<i>Şahsene Altınkaya and Sibel Yalçın</i> Faber polynomial coefficient estimates for bi-univalent functions of complex order based on subordinate conditions involving of the Jackson (p, q) -derivative	555
<i>Qamrul Hasan Ansari, Javad Balooee, and Adrian Petruşel</i> Some remarks on regularized multivalued nonconvex equilibrium problems	573
<i>R. Arab</i> Some generalizations of Darbo fixed point theorem and its application . . .	595
<i>Muhammad Arshad and Aftab Hussain</i> Fixed point results for generalized rational α -Geraghty contraction	611
<i>Orest Artemovych</i> FC -rings	623
<i>Cristina Ballantine and Mircea Merca</i> Finite differences of Euler's zeta function	639
<i>Dan Bărbosu and Gheorghe Ardelean</i> The Bernstein cubature formula revised	643
<i>Eva Brestovanská, František Jaroš, and Milan Medveď</i> Existence results for systems of iterative differential equations	655
<i>L.-C. Ceng, Y.-C. Liou, C.-T. Pang, and C.-F. Wen</i> On generalized vector equilibrium-like problem in topological vector spaces	665
<i>Ivan Chajda and Helmut Länger</i> Orthomodular lattices can be converted into left residuated l-groupoids . .	685

CONTENTS

Ivan Chajda and Helmut Länger

On the structure of balanced near semirings 691

Alexander Chichurin

Computer algorithm for solving of the Chazy equation of the third order
with six singular points 701

N. V. Dung, N. T. Hieu, and V. T. L. Hang

The metric approach to fixed point theorems in metric-like spaces 717

Figen Eryılmaz and Şenol Eren

On cofinitely weak δ -supplemented modules 731

M. Gabeleh, O. Olela Otafudu, and R. Plebaniak

Proximal monotonicity in partially ordered
metric spaces and F -cyclic contractions 739

Wei Gao and Weifan Wang

Degree sum condition for fractional ID- k -factor-critical graphs 751

Said R. Grace, John R. Graef, and Ercan Tunç

Oscillatory behavior of second order damped neutral differential equations
with distributed deviating arguments 759

N.S. Hajiyeva, N.A. Safarova, and N.A. Ismailov

Algorithm defining the hydraulic resistance coefficient by lines method in
gas-lift process 771

Abdelkader Hamtat and Djilali Behloul

On a Diophantine equation on triangular numbers 779

Attila Házy, Péter Olajos, Imre Piller, and Szilvia Szilágyi

A numerical example for the intersection of the compatible quasilinear ex-
tensions of a partial order 787

CONTENTS

Xiao-Hong He, Yue-Ying Yang, and Wei-Mao Qian Sharp power mean bounds for the second Neuman mean	801
Yong Huang, Yunru Bai, Yiliang Liu, and Iván Szántó Existence of solutions for fractional interval-valued differential equations by the method of upper and lower solutions	811
Sabir Hussain and Sobia Rafeeq Some new Hermite-Hadamard type integral inequalities for functions whose n th derivatives are logarithmically relative h -preinvex	837
Nurettin Irmak and Murat Alp Balancing with powers of the Lucas sequence of recurrence $u_n = Au_{n-1} -$ u_{n-2}	851
M. Kara Approximation by q -Durrmeyer - Stancu polynomials in compact disks in the case of $q > 1$	859
Mehmet Kir, Mehmet Ali Akturk, Hemen Dutta, and Esra Yolacan An extension of rational contractive condition in partially ordered rectan- gular metric spaces	873
Bülent Köklüce and Ibrahim Karatay Theta function identities and representation numbers of certain quadratic forms in twelve variables	889
Takao Komatsu and Yilmaz Simsek Identities related to the Stirling numbers and modified Apostol-type num- bers on Umbral Calculus	905
Grażyna Krech On the degree of approximation by modified gamma operators	917

CONTENTS

Kamil Kular

A commutativity criterion for δ -prime rings 925

M. A. Latif, Sever S. Dragomir, and E. Momoniat

Some estimates on the Hermite-Hadamard inequality through geometrically quasi-convex functions 933

Zhenhai Liu and Iván Szántó

Limit cycles and invariant centers for an extended Kukles system 947

Radosław Łukasik

Some orthogonality equation with two functions 953

H. Fazaeli Moghimi and F. Rashedi

Primary-like submodules and a scheme over the primary-like spectrum of modules 961

Sulkhan Mukhigulashvili

The mixed BVP for the second order nonlinear ordinary differential equation at resonance 975

Celil Nebiyev and Hasan Hüseyin Ökten

β_* relation on lattices 993

A. Rontó, M. Rontó, and I. Varga

Partially solved differential systems with two-point non-linear boundary conditions 1001

A. Samoilenko, A. Boichuk, and S. Chuiko

Hybrid difference-differential boundary-value problem 1015

Erhan Set and Merve Avcı Ardaç

Inequalities for log s -convex functions and P -functions 1033

CONTENTS

Erhan Set and Barış Çelik

On generalizations related to the left side of Fejer's inequality via fractional
integral operator 1043

N. Sveikate and F. Sadyrbaev

On conversion of resonant problem to non-resonant one 1059

JinRong Wang and Hamdy M. Ahmed

Null controllability of nonlocal Hilfer fractional stochastic differential equa-
tions 1073
