**CONTENTS**

<b>M. Alizadeh and M. Alimohammady</b>	
Regularity and entropy solutions of some elliptic equations . . . . .	715
<b>Mohammad Ashraf, Almas Khan, and Malik Rashid Jamal</b>	
Traces of permuting generalized $n$ -derivations of rings . . . . .	731
<b>Hacène Belbachir and Hakim Harik</b>	
Link between Hosoya index and Fibonacci numbers . . . . .	741
<b>Olga Belova</b>	
An analog of Neifeld's connection induced on the space of centred planes	749
<b>Csaba Biró and Gábor Kusper</b>	
Equivalence of strongly connected graphs and black-and-white 2-SAT problems . . . . .	755
<b>Ivan Chajda and Helmut Länger</b>	
Derivations in Łukasiewicz semirings . . . . .	769
<b>S. Chandok, A.H. Ansari, T. Došenović, and S. Radenović</b>	
On $\alpha_\beta$ -contractive and admissible mappings . . . . .	787
<b>Erkan Cimen and Musa Cakir</b>	
Convergence analysis of finite difference method for singularly perturbed nonlocal differential-difference problem . . . . .	795
<b>S. Das and H. Dutta</b>	
Characterization of some matrix classes involving some sets with speed . .	813
<b>Uğur Değer and Hilal Bayindir</b>	
Approximation by Nörlund and Riesz type deferred Cesàro means in the space $H_p^{(\omega)}$ . . . . .	823

**CONTENTS**

***Esra Erkuş-Duman***

- Some new properties of univariate and multivariate Gottlieb polynomials . . . . . 835

***Fatma Tokmak Fen***

- On the solutions of a multi-point BVP for fractional differential equations  
with impulses . . . . . 847

***H. R. Hashim and Sz. Tengely***

- Representations of reciprocals of Lucas sequences . . . . . 865

***Yue He and Gendi Wang***

- Generalized convexity of the inverse hyperbolic cosine function . . . . . 873

***K.-T. Howell and S. P. Sanon***

- Near-vector spaces constructed from near domains . . . . . 883

***Shuliang Huang***

- An identity with derivations in prime rings . . . . . 899

***T. Jangveladze, Z. Kiguradze, and M. Kratsashvili***

- Uniqueness of solution and fully discrete scheme to nonlinear integro-differential averaged model with source terms . . . . . 907

***Guojing Jiang and Shin Min Kang***

- Common fixed point theorems with an application in dynamic programming 923

***Waqar Khan, Faisal Yousafzai, and Kostaq Hila***

- Congruences and decompositions of AG<sup>\*\*</sup>-groupoids . . . . . 931

***Yeliz Kara***

- Modules whose projection invariant submodules have projection invariant  
closures . . . . . 945

**Miskolc  
Mathematical  
Notes**

VOLUME 19 (2018), NUMBER 2

---

**CONTENTS**

**Rupali Kaushal, Rakesh Kumar, and Rakesh Kumar Nagaich**

- Lightlike submersions from totally umbilical semi-transversal lightlike submanifolds . . . . . 953

**Aleksandra Kostić, Zoran Z. Petrović, Zoran S. Pucanović, and Maja Roslavcev**

- A generalization of nil-clean rings . . . . . 969

**L. Kovács**

- Efficient approximation for counting of formal concepts generated from formal context . . . . . 983

**Dorde Krtinić and Marija Mikić**

- Refinement of Hermite–Hadamard type inequalities for  $s$ –convex functions 997

**Mehmet Kunt, İmdat İşcan, Sercan Turhan, and Dünnyar Karapınar**

- Improvement of fractional Hermite–Hadamard type inequality for convex functions . . . . . 1007

**H.-H. Leung**

- Determinants containing powers of polynomial sequences . . . . . 1019

**Shahlar Meherrem, Deniz H. Gucoglu, and Samir Guliyev**

- Numerical solution of linear-quadratic optimal control problems for switching systems . . . . . 1035

**Janusz Migda and Małgorzata Nockowska-Rosiak**

- Asymptotic behavior of solutions of second order difference equations with deviating argument . . . . . 1047

**Veronika Novotná and Bedřich Puža**

- On the construction of solutions of general linear boundary value problems for systems of functional differential equations . . . . . 1063

**Miskolc  
Mathematical  
Notes**

VOLUME 19 (2018), NUMBER 2

---

**CONTENTS**

***Neşe Ömür and Sibel Koparal***

- Some interesting congruences for ballot numbers . . . . . 1079

***Páll-Szabó Á. O.***

- On a class of univalent functions defined by Sălăgean integro-differential operator . . . . . 1095

***Choonkil Park***

- Additive  $(\alpha, \beta)$ -functional equations and linear mappings . . . . . 1107

***L. Romakina***

- To a question on the existence of regular mosaics on a hyperbolic plane of positive curvature . . . . . 1117

***Miklós Rontó***

- The seventh international Workshop – 2018 “Constructive methods for non-linear boundary value problems” . . . . . 1133

***Vojtěch Růžička***

- Nonoscillation of even order Euler type half-linear difference equations . . 1137

***Anatoly M. Samoilenko and Lidiya M. Sergeeva***

- About global solution of nonhomogeneous neutral partial differential equation with deviating argument in the time variable . . . . . 1163

***Y. Soylu***

- Upper bounds on the diameter for Finsler manifolds with weighted Ricci curvature . . . . . 1173

***L.Q. Thuy, C.-F. Wen, J.-C. Yao, and T. N. Hai***

- An extragradient-like parallel method for pseudomonotone equilibrium problems and semigroup of nonexpansive mappings . . . . . 1185

***Miskolc  
Mathematical  
Notes***

**VOLUME 19 (2018), NUMBER 2**

---

**CONTENTS**

***Ü. Totur and İ. Çanak***

- On the Cesàro summability for functions of two variables . . . . . 1203

***Neset Deniz Turgay***

- Invariants under decomposition of the conjugation in the mod 2 dual Leibniz-Hopf Algebra . . . . . 1217

***S. K. Vaidya and N. J. Kothari***

- Distance  $k$ -domination in some cycle related graphs . . . . . 1223

***I. Varga***

- On investigation of some non-linear integral boundary value problem . . . . . 1233
