

**CONTENTS**

<b><i>İ. Aktaş, E. Toklu, and H. Orhan</i></b>	
Radii of $k$ -Starlikeness of order $\alpha$ of Struve and Lommel functions . . . . .	5
<b><i>Bilender P. Allahverdiev</i></b>	
Dilations, models and spectral problems of non-self-adjoint Sturm-Liouville operators . . . . .	17
<b><i>Necmettin Alp</i></b>	
Erratum: Simpson type quantum integral inequalities for convex functions	33
<b><i>Gabil M. Amiraliyev, Muhammet Enes Durmaz, and Mustafa Kudu</i></b>	
A Numerical Method for a Second Order Singularly Perturbed Fredholm Integro-Differential Equation . . . . .	37
<b><i>Tadeusz Antczak and Ram Verma</i></b>	
Optimality conditions and duality results for a new class of nonconvex non-smooth vector optimization problems . . . . .	49
<b><i>S. Bujačić Babić and K. Nabardi</i></b>	
On Some Diophantine Equations . . . . .	65
<b><i>Hacène Belbachir and Yahia Djemmada</i></b>	
On central Fubini-like numbers and polynomials . . . . .	77
<b><i>R. A. Borzooei, M. Mohseni Takallo, M. Aaly Kologani, and Y.B. Jun</i></b>	
Fuzzy sub-hoops based on fuzzy points . . . . .	91
<b><i>Musa Çakmak, Mevlüt Tunç, and Aysegül Acem</i></b>	
Some new inequalities for differentiable $h$ -convex functions and applications	107
<b><i>Gamaliel Cerda-Morales</i></b>	
On third-order Jacobsthal polynomials and their properties . . . . .	123

**CONTENTS**

**Alexander Chichurin and Galina Filipuk**  
Linear equations with one constraint and their connection to nonlinear equations of the fourth order . . . . . 133

**Pradip Debnath**  
Optimization through best proximity points for multivalued  $F$ -contractions 143

**İzzettin Demir**  
Fixed point theorems in complex valued fuzzy  $b$ -metric spaces with application to integral equations . . . . . 153

**Abdullah Ergün**  
Inverse problem for singular diffusion operator . . . . . 173

**Sergio Falcon**  
On the generalized  $k$ -Fibonacci numbers . . . . . 193

**M. Ghorbani, M. R. Darafsheh, and Pedram Yousefzadeh**  
On the prime graph of a finite group . . . . . 201

**Salsabil Hajjaji and Farouk Chérif**  
 $S^p$ -Almost periodic and  $S^p$ -almost automorphic solutions of an integral equation with infinite delay . . . . . 211

**Chun-Ying He, Bo-Yan Xi, and Bai-Ni Guo**  
Inequalities of Hermite–Hadamard type for extended harmonically  $(s, m)$ -convex functions . . . . . 245

**Deepak Jain, Sanjay Kumar, and Choonkil Park**  
Variants of  $R$ -weakly commuting mappings satisfying a weak contraction 259

**CONTENTS**

**Bidu Bhusan Jena and Susanta Kumar Paikray**  
Statistical Convergence of Martingale Difference Sequence via Deferred  
Weighted Mean and Korovkin-type Theorems . . . . . 273

**Havva Kavurmaci-Önalán**  
Hermite-Hadamard Type Inequalities for Some Convex Dominated Func-  
tions via Fractional Integrals . . . . . 287

**S. Khademan, M. M. Zahedi, R. A. Borzooei, and Y. B. Jun**  
Fuzzy Soft Positive Implicative Hyper *BCK*-Ideals of Several Types . . . 299

**M. A. Pathan and Waseem A. Khan**  
A new class of generalized polynomials associated with Hermite and poly-  
Bernoulli polynomials . . . . . 317

**A. Khelifa, Y. Halim, and M. Berkal**  
On the solutions of a system of  $(2p + 1)$  difference equations of higher order 331

**M. Khodabakhshi, S.M. Vaezpour, and M. R. Heidari Tavani**  
Existence results for a Kirchhoff-type problem with singularity . . . . . 351

**Sezai Kızıltuğ, Mehmet Önder, and Yusuf Yaylı**  
Normal Direction Curves and Applications . . . . . 363

**D. Vamshee Krishna**  
Third Hankel determinant for certain subclass of  $p$ -valent analytic functions 375

**B. V. Senthil Kumar, Khalifa Al-Shaqsi, and Hemen Dutta**  
Hyperstability of Rassias-Ravi reciprocal functional equation . . . . . 383

**AmirHossein Nafei, Yongyi Gu, and Wenjun Yuan**  
An Extension of the TOPSIS for Multi-Attribute Group Decision Making  
under Neutrosophic Environment . . . . . 393

# *Miskolc Mathematical Notes*

VOLUME 22 (2021), NUMBER 1

## CONTENTS

<i>A. Najafi, A. Borumand Saeid, and E. Eslami</i> Centralizers of <i>BCI</i> -algebras . . . . .	407
<i>Celil Nebiyev</i> Essential radical supplemented modules . . . . .	427
<i>Hasan Hüseyin Ökten</i> <i>G</i> -supplemented Lattices . . . . .	435
<i>Yongfu Su, Yinglin Luo, Adrian Petruşel, and Jen-Chih Yao</i> A study of a special kind of <i>N</i> -fixed point equation system and applications	443
<i>Chaosheng Zhu</i> Global Attractor for the time discretized modified three-dimensional Bénard systems . . . . .	457
