

CONTENTS

József Abaffy and Vittorio Moriggia
Twice is enough method for $A^T A$ conjugate directions and for biconjugate directions 5

Zoya Abdullah, Awais Yousof, Chanon Promsakon, and Thanin Sitthiwiratham
On some new and general q -Hermite–Hadamard type inequalities for convex functions 21

Uzair Ahmed, Mo Faheem, Arshad Khan, and Geetan Manchanda
A Legendre Wavelet Collocation Method for Solving Neutral Delay Differential Equations 35

Amir Amiraslani, Masoumeh Koohestani, and Amir Rahnamai Barghi
Some results on characters of a class of P-polynomial table algebras . . . 49

Mohammad Arif and Mohammad Imdad
Coincidence point results on a metric space endowed with a locally T -transitive binary relation employing comparison functions 63

Selahattin Aslan, Murat Bekar, and Yusuf Yaylı
Representation of generalized circular surfaces as rigid body motions . . . 79

Enes Ata
M-Srivastava hypergeometric functions: integral representations and solution of fractional differential equations 93

Mustafa Aydin and Nazim I. Mahmudov
The μ -neutral fractional multi-delayed differential equations 109

Abdullah Aydin and Hatice Ünlü Eroğlu
Statistically p_τ -convergence in lattice-normed locally solid Riesz spaces . 127

Miskolc Mathematical Notes

VOLUME 25 (2024), NUMBER 1

CONTENTS

- Canay Aykol and J. Javanshir Hasanov*
Riesz potentials in the local variable Morrey-Lorentz spaces and some applications 141
- Martin Bohner, Giuseppe Caristi, Shapour Heidarkhani, and Amjad Salari*
Critical point approaches to nonlinear square root Laplacian equations . . . 153
- Abdelhak Bousgheiri and Anass Ourraoui*
Note on blow up solutions for a general class of semilinear parabolic equations involving second order operator 165
- Tawanda Gallan Chakuvinga and Fatma Serap Topal*
Positive solutions for integral boundary value problems of nonlinear fractional differential equations 173
- Sezgin Altay Demirbag, Uday Chand De, and Fusun Ozen Zengin*
Certain investigations of pseudo Z -symmetric spacetimes 189
- Artūras Dubickas*
On a sequence of rational numbers with unusual divisibility by a power of 2 203
- Salah G. Elgendi*
A new look at Finsler surfaces and Landsberg's PDE 209
- Baransel Gunes and Musa Cakir*
A numerical comparative study for the singularly perturbed nonlinear Volterra-Fredholm integro-differential equations on layer-adapted meshes . . . 225
- Nesrin Güler and Melek Eriş Büyükkaya*
Comparison of BLUPs under Multiple Partitioned Linear Model and its Correctly-Reduced Models 241

Miskolc Mathematical Notes

VOLUME 25 (2024), NUMBER 1

CONTENTS

Vishal Gupta, Anil Saini, and Aanchal Gondhi

On modified intuitionistic fuzzy soft metric spaces and application 255

Hamida Hamioud, Imane Dekkar, and Nouressadat Touafek

Solvability of a third-order system of nonlinear difference equations via a generalized Fibonacci sequence 271

Kenichi Hirose

Note on the moment generating function of the multivariate normal distribution 287

Ayushi Kapoor and Vivek Sahai

On models of the Lie algebra K_5 and Lauricella functions using an integral transformation 301

Oleksiy Kapustyan, Olena Kapustian, Ihor Korol, and Bruno Rubino

Attracting sets of impulse-perturbed heat equation in the space of continuous functions 317

Ali Karaođlan, Erhan Set, Ahmet Ocak Akdemir, and M. Emin Özdemir

Fractional integral inequalities for preinvex functions via Atangana-Baleanu integral operators 329

Vakeel Ahmad Khan, Mikail Et, and Umme Tuba

On ideal convergence of Sequences via Catalan matrix operator 349

Berna Koşar and Hasan Hüseyin Ökten

Amply socle supplemented modules 367

Dayong Liu and Aixiang Fang

The group invertibility of matrices over Bézout domains 373

CONTENTS

Waewta Luangboon, Kamsing Nonlaopon, Mehmet Zeki Sarikaya, and Hüseyin Budak
Newton-type inequalities associated with convex functions via quantum calculus 383

Mariam Manjikashvili and Sul Khan Mukhigulashvili
Two-point boundary value problems for 4th order ordinary differential equations 399

Khadija Oufkir, Ali El Mfadel, Said Melliani, M'hamed Elomari, and Hamid Sadiki
Existence and uniqueness results for a coupled system of nonlinear Ψ -fractional differential equations with fractional integral boundary conditions 411

Saikat Panja and Sachchidanand Prasad
Counterexample to a conjecture about dihedral quandle 425

Ayten Pekin and Celil Nebiyev
On cofinitely flat quadratic O_K -modules 429

Mohd Arif Raza, Aisha Jabeen, and Tahani Al-Sobhi
Lie triple derivation and Lie bi-derivation on quaternion rings 433

Jajati Keshari Sahoo, Gayatri Maharana, Bibekananda Sitha, and Nestor Thome
1D inverse and D1 inverse of square matrices 445

Brian D. Sittinger and Vickie V. Chen
The density of tuples restricted by relatively r -prime conditions 465

Hari Mohan Srivastava, Sevtap Sümer Eker, Bilal Şeker, and Bilal Çekiç
Second Hankel Determinant of the Logarithmic Coefficients for a Subclass of Univalent Functions 479

Miskolc Mathematical Notes

VOLUME 25 (2024), NUMBER 1

CONTENTS

Iván Szántó.

A polynomial system of degree four with an invariant triangle containing
at least four small amplitude limit cycles 489

Moctar Traore, Hakan Mete Taştan, and Sibel Gerdan Aydın

On almost η -Ricci-Bourguignon solitons 493

Gulsen Ulucak, Sakineh Babaei, and Esra Sengelen Sevim

On n -1-absorbing primary ideals 509

Zehra Yücedag

Existence and Multiplicity of Solutions for a $p(x)$ -Kirchhoff Type Equation
with Steklov Boundary 523
