

CONTENTS

Mohammad Alnegga, Abdelbaki Choucha, Djamel Ouchenane, and Salah Boulaaras
General decay and blow up of solutions for a Kirchhoff-type equation with
variable-exponents 537

Ilhame Amirali, Muhammet Enes Durmaz, and Gabil M. Amiraliyev
A numerical approach for solving Volterra delay integro-differential equation 553

Seon Hye An, Rekha Srivastava, and Nak Eun Cho
New approaches for subordination and superordination of multivalent func-
tions associated with a family of linear operators 563

Najib Askouraye and Myelkebir Aitalioubrahim
On two and three and four point boundary value problems for differential
inclusions with ϕ -Laplacian 579

Souad Ayadi and Ozgur Ege
Existence of Solutions for a Class of BVPs on the Half-line 593

Umut Bas, Hüseyin Budak, and Hasan Kara
New extensions version of Hermite–Hadamard type inequalities by means
of conformable fractional integrals 605

Bouharket Benaissa and Huseyin Budak
General $((k, p), \psi)$ -Hilfer fractional integrals 619

Gülstan Butakın and Erhan Pişkin
Existence and blow up of solutions of a viscoelastic $m(x)$ -biharmonic equa-
tion with logarithmic source term 631

Tingsong Du and Lei Xu
Hermite–Hadamard- and Pachpatte-type integral inequalities for general-
ized subadditive functions in the fractal sense 647

Miskolc Mathematical Notes

VOLUME 25 (2024), NUMBER 2

CONTENTS

Banh Duc Dung

Rings characterized by the extending property for finitely generated sub-modules 663

Ranran Fan, Min Zeng, and Yongxin Yuan

The solutions to some dual matrix equations 679

Sena Halıcı and Ayşegül Çetinkaya

k -Srivastava hypergeometric functions and their integral representations . . 693

Emília Halušková

On discrete properties of continuous monotone functions 707

Murad Khan Hassani, Yasin Yazlık, and Nouressadat Touafek

Dynamics of positive solutions of a three dimensional higher order system of difference equations 723

Nguyen H. Hoc and Ravindra K. Bisht

Fixed point theorems of asymptotically regular maps 747

Eszter K. Horváth and Andreja Tepavčević

On the numbers of weak congruences of some finite lattices 759

Nazlı Irkil

On the local existence of solutions to p -Laplacian equation with logarithmic nonlinearity and nonlinear damping term 771

Aisha Jabeen

On n -derivations of generalized matrix algebras 789

Waseem Ahmad Khan, Divesh Srivastava, and Kottakkaran Sooppy Nisar

A new class of generalized polynomials associated with Milne-Thomson-based poly-Bernoulli polynomials 805

CONTENTS

Gizem Köprülü Karakaş and Bayram Şahin
Biharmonic curves along Riemannian submersions 817

Péter Kórus, Juan Eduardo Nápoles Valdés, José Manuel Rodríguez, and José María Sigarreta Almira
Petrović-type inequality via fractional calculus 833

Ömer Küsmüş
Unit Group of Integral Group Ring $\mathbb{Z}(G \times C_3)$ 845

Kartikeswar Mahalik and Chandal Nahak
Well-posedness characterizations for system of mixed hemivariational inequalities 857

Farid Mihoubi and Brahim Nouiri
An inverse time-dependent source problem for a time-fractional diffusion equation with nonlocal boundary conditions 873

Mădălina Moga and Radu Truşcă
On some fixed point theorems for Ćirić operators 891

Babak Mohammadi, Mohammad Mursaleen, and Vahid Parvaneh
Solvability of integral equations via the technique of measures of noncompactness 907

Karima Mokni and Mohamed Ch-Chaoui
Dynamic analysis and Chaos control in a discrete predator-prey model with Holling type IV and nonlinear harvesting 921

Dijana Mosić, Daochang Zhang, and Jianping Hu
On operators whose core-EP inverse is n -potent 943

Miskolc Mathematical Notes

VOLUME 25 (2024), NUMBER 2

CONTENTS

<i>Celil Nebiyev and Nurhan Sökmez</i> Some Properties of r -Supplemented Modules	957
<i>Celil Nebiyev and Hasan Hüseyin Ökten</i> On Finitely g -Supplemented Modules	965
<i>Zdeněk Opluštil</i> On non-oscillation for two dimensional systems of non-linear ordinary differential equations	971
<i>Erhan Set, Ali Karaođlan, İmdat İřcan, and Neslihan Kılıç</i> On (M, P) -functions with some features and new inequalities	985
<i>Sergey Smirnov</i> Multiplicity of positive solutions for a third-order boundary value problem with nonlocal conditions of integral type	999
<i>Swati Jain, Teerathram Raghuwanshi, Manoj Kumar Pandey, and Anil Goyal</i> On generalized M -projective curvature tensor of para-Sasakian manifold	1009
<i>Abdellah Taqbibt, M'Hamed El Omari, and Said Melliani</i> Solving Caputo fractional order differential equations via fixed point results of α -Geraghty contraction type mappings	1025
<i>Zhengyan Wang, Yan Zhang, and Peibiao Zhao</i> Optimal cash holding model based on minimization of ruin probability	1043
<i>Zhen Zhang and Shance Wang</i> The Auslander-Reiten correspondence about ∞ -cotilting objects in extriangulated categories	1061
<i>Hou Yu Zhao and Shan Shan Guo</i> Nondecreasing bounded continuous solutions of a q -difference equation	1075
