

CONTENTS

<i>Omar Farouk Aid and Abderrahamne Senoussaoui</i> Characterizations of trace class semiclassical Fourier integral operators . . .	5
<i>Bilender P Allahverdiev, Hüseyin Tuna, and Hamlet A Isayev</i> Weyl's classification of singular impulsive Hahn–Sturm–Liouville equations	17
<i>Fouad Ibrahim Abdou Amir, Aziz El Ghazouani, M'hamed El Omari, and Said Melliani</i> Existence of solutions to non-local uncertain differential equations under the ψ -Caputo fractional derivative	31
<i>Blanka Baculikova</i> Properties of second order differential equations with advanced and delay argument	51
<i>Zsolt Balogh</i> Monte Carlo method and group algebras	61
<i>Abdellatif Ben Makhlouf and El-sayed El-hady</i> Hyers-Ulam-Rassias Stability of some sequential neutral functional differential equations with Caputo-Hadamard fractional derivative	69
<i>Messaoud Berkal and Juan Francisco Navarro</i> Dynamics of a discrete-time predator-prey system with ratio-dependent functional response	81
<i>Mona Aaly Kologani, Gholam Reza Rezaei, Young Bae Jun, and Rajab Ali Borzooei</i> Łukasiewicz fuzzy sub-hoops	101
<i>Hüseyin Budak, Umut Baş, Hasan Kara, and Fatih Hezenci</i> Some bounds of Hermite–Hadamard-type inequalities based on conformable fractional integrals	115

CONTENTS

Mohamed Chaib, Abdellah Taqbibt, M'hamed Elomari, and Said Melliani Mild solutions for fractional differential equations in Colombeau algebra	137
Ivan Chajda and Helmut Länger On algebras whose congruences have a class that is a subuniverse	151
Elena Cojuhari and Barry Gardner Relatively hereditary radical classes of rings	163
Shilpa Das, Veysel Nezir, and Aysun Güven New asymptotically isometric properties that imply the failure of the fixed point property in copies of ℓ^1	181
Melek Eriş Büyükkaya and Nesrin Güler Predictor/estimator computations under a constrained multivariate linear model and some related reduced models	195
Marziyeh Felahat Convergence analysis of the Legendre wavelets method for a class of Fredholm- Volterra integro-differential equations of fractional-order	209
Ahmed Ghezal and Imane Zemmouri M -estimation in periodic Threshold $GARCH$ models: Consistency and asymptotic normality	229
Hami Gündoğdu, Mahpeyker Öztürk, and Ömer Faruk Gözükcül Some fixed point results for generalized modified F_α -contractions in mod- ular metric spaces and its applications	243
Angshuman R. Goswami and Ferenc Hartung Hermite-Hadamard type inequalities by using Newton-Cotes quadrature formulas	261

CONTENTS

Yacine Halim, Asma Allam, and Ibraheem M. Alsulami

On a multidimensional close-to-cyclic system of difference equations . . . 275

Nuket Aykut Hamal

Analysis of mixed differential equations involving the Caputo and Riemann-Liouville fractional derivatives 291

Huriye Kadakal and Mahir Kadakal

Inverse trigonometrically convexity and better approximations 305

Esra Kaya and Canay Aykol

B –maximal and B –singular integral operators in B –local Morrey-Lorentz spaces 321

Zeynep Kayar and Billur Kaymakçalan

Complements of nabla and delta Hardy-Copson type inequalities and their applications 335

Sandeep Kumar and Naokant Deo

Convergence analysis of semi-exponential Post-Widder operators 367

Kexue Li

Well-posedness for Fractional Hardy-Hénon parabolic equations with fractional Brownian motion 383

Bappa Ghosh and Jugal Mohapatra

Numerical solution of time fractional Volterra integro-differential equations 395

Ismail Nikoufar

An estimation for the generalized ternary ring homomorphism on non-Archimedean ternary Banach algebras 411

CONTENTS

<i>Sofiya Ostrovska and Mehmet Turan</i> On quasi-Weibull distribution	425
<i>Buddhadev Pal, Mahendra Kumar, and Santosh Kumar</i> Study of bi-f-harmonic curve along immersions	437
<i>Zahra Parvizi, Somayeh Motamed, and Farhad Khaksar Haghani</i> Some new filters and their properties on BL-algebras	455
<i>Aleksandar Petojević, Hari Mohan Srivastava, and Marijana Gorjanac Ranti- tović</i> Some new results associated with Ramanujan's numbers $\tau(n)$	485
<i>Mustapha Raïssouli and Mohamed Chergui</i> Some inequalities involving generalized hypergeometric functions via dis- crete Jensen's type inequalities	493
<i>M. Sambasiva Rao and Arsham Borumand Saeid</i> Generalized Stonean BE-algebras	501
<i>Ifra Bashir Sial, Sun Mei, Muhammad Aamir Ali, and Hüseyin Budak</i> On some inequalities related to open Newton-Cotes formulas for differen- tiable convex functions with applications	517
<i>Haijun Wang, Guiyao Ke, Jun Pan, and Qifang Su</i> Conjoined Lorenz-like attractors coined	527
<i>Handan Çerdik Yaslan</i> Approximate solution of the conformable integro-differential equations . .	547
